

FIRST 10 VIDEOS PLANNER

First 10 Videos — Planning Sheet

What it is: A fillable plan for the first 10 uploads after a niche **PASS** — built for a full-time worker using Owner OS (judgment in, repetitive out).

When to use it: Scorecard PASS + one winning-format reference transcript extracted.

How to load this (1 page)

Sheets

Import 05-first-10-videos-planner.csv

Notion

Board columns: Idea → Script ready → With editor → Thumb done → Scheduled → Live → Post-mortem

Claude

Attach this file + one competitor transcript:

Fill videos 1–10 using the same winning format psychology. New objects only. No copied facts.

Before row 1

Checkpoint	Done?
Niche scorecard PASS (total + hard gates)	[]
Blank-account costume OR trusted shortlist	[]
1 reference video transcript saved	[]
Editor job post live / editor assigned (\$20–\$30 target)	[]
Claude / ScriptWriter path ready	[]
You will NOT edit the videos yourself	[]

Winning format lock (one paragraph)

Format name: _____

Viewer psychology (what they want every time): _____

Structure beats (hook → promise → cycle → recap): _____

Length target: _____ min Edit budget: \$ _____

Compliance note (disclaimer? educational?): _____

The 10 rows

#	Working title	Promise (1 line)	Format beat match (Y/N)	Script owner	Editor due	Thumb ref	Status	48h impressions	CTR	AVD	Keep/iterate
1											
2											
3											
4											
5											
6											
7											
8											
9											
10											

Rule: Videos 1–3 may be learning tax. Do not pivot before Node 0 of the decision tree unless hard gate appears (copyright strike, ban pattern).

Weekly Owner OS (15–30 min/day pattern)

From teaching / leftovers CEO checklist spirit:

Minutes	You do
1–5	Find / confirm tomorrow’s proven angle
5–10	Script via Claude (pacing clone / ScriptWriter)
10–12	Send to editor
12–15	QA yesterday’s cut + thumb + schedule

Do not: edit, record endless VO takes if Fish/AI VO is in stack, rewrite scripts from zero without a transcript map.

After video 7 and video 10

Run `04-pivot-or-persist-decision-tree.md`.
Log one sentence learning per video in post-mortem column.

Example filled row (pattern only)

#	Title idea	Promise
1	“The Social Security claiming age mistake that quietly costs retirees”	Explain one rule clearly for living-room viewer

(Replace with *your* niche objects. Do not copy competitor titles.)
